

EVERY ENDING HOLDS A **BEGINNING**

Recycle your **End-of-Life**
Vehicle Today

| Who Are We?

Re Carma, powered by Re Sustainability Limited, is enabling India's transition to a structured and sustainable End-of-Life Vehicle (ELV) ecosystem through technology-driven, compliant, and transparent vehicle scrapping solutions.

Backed by nearly three decades of leadership in recycling, resource recovery, and environmental services, Re Carma combines operational expertise with digital innovation to deliver seamless ELV management at scale. Through an integrated network of authorized Registered Vehicle Scrapping Facilities (RVSFs), we ensure responsible dismantling, regulatory compliance, material traceability, and maximum resource recovery.

Built for vehicle owners, OEMs, dealerships, insurers, and ecosystem partners, Re Carma is driving circular economy outcomes by transforming end-of-life vehicles into valuable resources, reducing environmental impact, and building a smarter, cleaner, and more compliant automotive recycling ecosystem.

| What We Offer

Designed to simplify vehicle scrapping while maximizing value.

- | | | | |
|---|--|--|---|
|  Scheduled Pick-up |  Doorstep Evaluation |  Best Price Assurance |  Instant Payment |
|  Certificate of Deposit (COD) |  Certificate of Vehicle Scrapping (CVS) |  Deregistration Support |  End-to-End Traceability |
|  Pan-India Network |  Regulatory Compliance | | |

Why Re Carma?

Backed by
Industry Leadership

Authorized
RVSF Operations

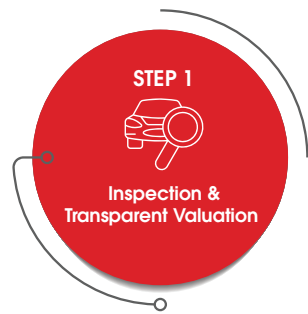

Technology-Driven
Transparency

Sustainable
Recovery Model

| Our Process

Comprehensive vehicle inspection and fair market valuation through our digital platform and expert team.

Complete documentation support, deregistration facilitation, and vehicle data capture for full compliance.

Advanced shredding and segregation of recoverable materials for reintegration into the manufacturing ecosystem.

Safe removal of hazardous materials including oils, fluids, batteries, and components, followed by structured dismantling.

| Recovered Materials

Through scientific dismantling and recycling, we recover:

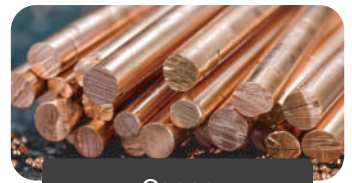

Steel

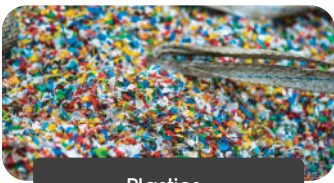

Iron

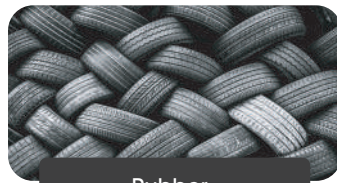

Aluminium

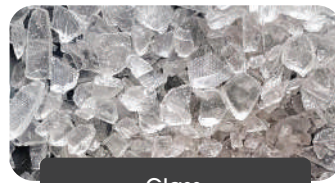

Copper

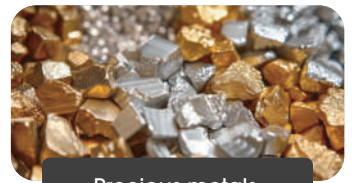

Plastics

Rubber

Glass

Precious metals

Every recovered material contributes to reducing landfill dependency and strengthening circular manufacturing.

| Value Proposition

Vehicle Owners

- App-based vehicle valuation
- Real-time process tracking
- COD access and support
- ELV memorabilia offerings
- Dedicated customer support

A transparent and trusted scrapping experience.

OEMs

- End-to-end EPR fulfilment
- Scrap traceability and compliance
- Circular supply chain enablement
- Dealer network integration
- Recovery insights and CO₂ analytics

Supporting sustainability commitments at scale.

Dealerships

- Complete ELV scrapping solution
- COD buy/sell marketplace
- Workshop scrap management
- ELV & COD dashboard
- Easy compliance documentation
- Faster vehicle sales

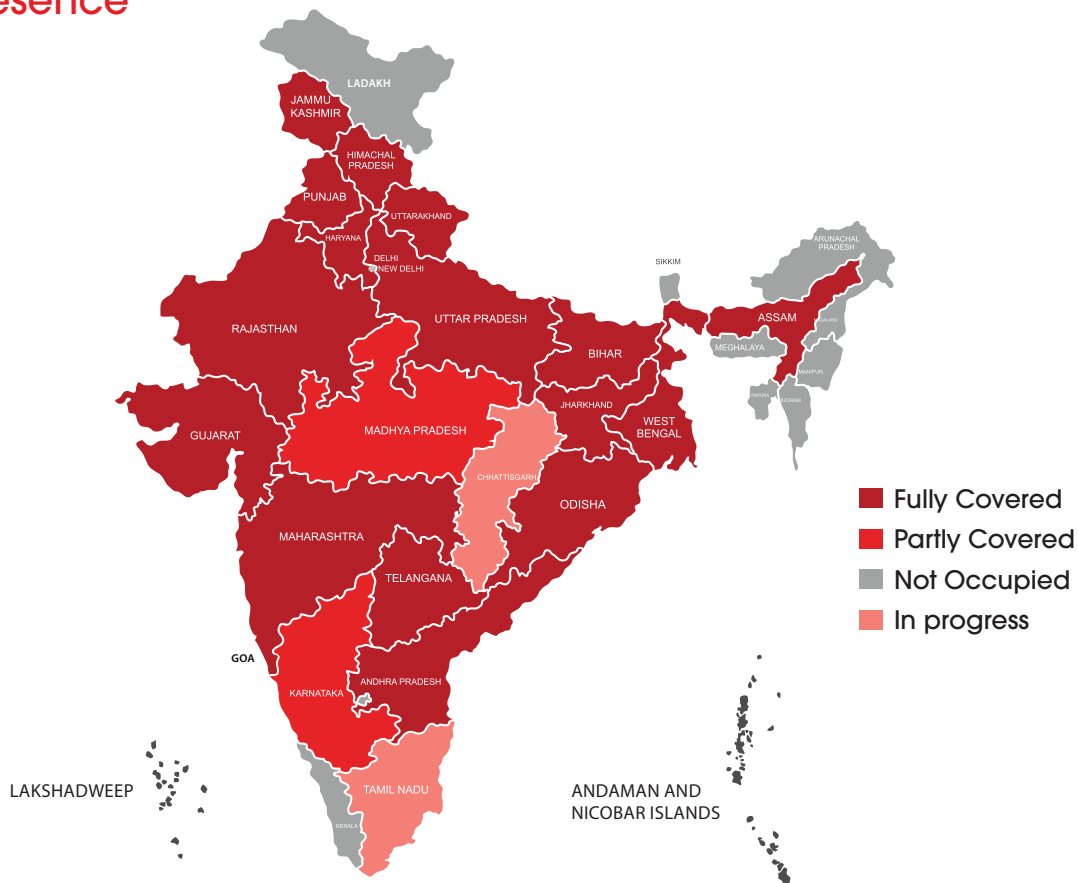

Driving efficiency across dealer networks.

RVSF (Registered Vehicle Scrapping Facilities)

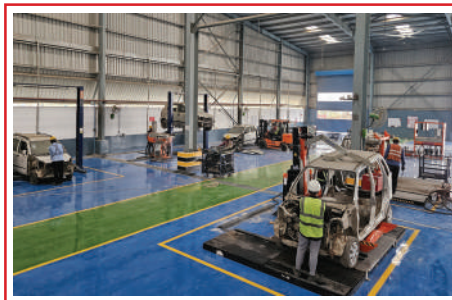

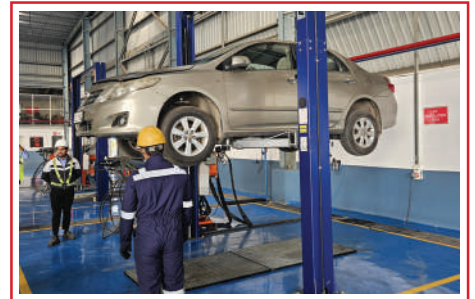

- Centralized ELV sourcing
- Assured material offtake
- COD marketplace access
- EPR support
- Traceability software
- Training & compliance readiness
- Branding & efficiency support

Building stronger, connected ELV infrastructure.
